Susan Campbell is the founder of *Science Safari*®. Since 1994, she has presented lively, interactive science enrichment programs for thousands of children in many venues including schools, recreation centers, homes, businesses and institutions. A life-long lover of science, she brings her own interest and enthusiasm to the children with whom she works. Whether it's a walk down the creek with a group of Little Leaguers and their parents or an experience with magnets and iron filings with kids in an After-School program, Susan loves what she does. Need a Science Fair judge? Give her a call!

Exciting, participatory science enrichment programs for children!
